Policy Paper on Environment Business and Technology University Tbilisi, Georgia

At Business and Technology University, we recognize the critical importance of environmental sustainability and the need to take responsibility for our environmental footprint and impact. We are committed to ensuring that our operations are conducted with the utmost respect for the environment and that we play a role in preserving and protecting our planet.

1. Assessment of Environmental Footprint and Impact

We are committed to continually assessing our environmental footprint and impact by:

- **Monitoring Resource Consumption:** We will regularly measure and analyze our energy consumption, water usage, and other resource consumption, identifying areas where reductions can be made.
- **Waste Management:** We will regularly assess our waste generation and disposal practices and seek opportunities to reduce waste and promote recycling.
- **Biodiversity Conservation:** We will evaluate the impact of our operations on local ecosystems and biodiversity, implementing measures to mitigate adverse effects.

2. Environmental Responsibility and Commitment

We are committed to conducting our business activities with the highest level of environmental responsibility. We recognize that our actions can have a significant impact on the environment, and we pledge to take the necessary steps to minimize any negative effects.

3. Compliance with Environmental Laws and Regulations

We will comply with all applicable environmental laws and regulations at the local, regional, and national levels. We will also adhere to international environmental agreements where relevant.

4. Pollution Prevention

We will strive to prevent pollution by reducing waste, emissions, and the use of hazardous materials. Pollution prevention will be a fundamental part of our operational practices.

5. Resource Conservation

We will actively seek to conserve natural resources such as water and energy by implementing efficient technologies and sustainable practices.

6. Sustainable Transportation

We encourage the use of environmentally friendly transportation options by providing infrastructure and incentives for walking, cycling, and the use of public transportation.

7. Recycling and Waste Management

We will establish recycling programs and proper waste disposal practices to reduce the environmental impact of our waste.

8. Environmental Education and Training

We will provide education and training to our employees, students, and stakeholders to raise awareness about environmental issues and promote environmentally responsible behaviors.

9. Environmental Risk Management

We will identify potential environmental risks associated with our activities and develop mitigation plans to minimize and manage those risks.

10. Continuous Improvement

We will regularly review and update our environmental policy and objectives to ensure that we are continually improving our environmental performance.

11. Collaboration and Engagement

We will engage with the wider community and stakeholders to collaborate on environmental initiatives and raise awareness of the importance of environmental responsibility.

12. Reporting and Communication

We will communicate our environmental performance and achievements transparently, both internally and externally, in a manner that promotes accountability and encourages improvement.

13. Commitment from Leadership

Our leadership team is fully committed to this policy and will provide the necessary resources and support to ensure its effective implementation.

This Corporate Environmental Policy will be communicated to all employees, students, and stakeholders of Business and Technology University. We encourage all individuals to embrace these principles and actively participate in our efforts to create a sustainable and environmentally responsible future.
